

Glove management program

Manage glove spend and receive recommendations designed to help you save money, better protect staff, and improve glove utilisation.

Find the glove you love with Medline's free assessment

Discovery

We perform a digital, in-person, or hybrid survey to determine glove usage on patient care floors and interview department managers in specialty areas.

Report

We provide a report detailing our findings and recommendations.

Implementation

We provide trial and conversion in-servicing to your teams, regularly checking in to ensure you've got the support you need.

Here's how we can help healthcare providers solve their glove challenges

Identify savings from consolidating product codes

Identify annual glove wastage

Identify opportunities to avoid glove overuse

So, how can we help?
