About Medline

We're a global healthcare company dedicated to being easy to partner with, solving problems, and providing good value. In Australia, from our network of warehouses nationally, we manufacture and distribute an expansive portfolio of products for hospitals, healthcare facilities, aged care, and the community.

Since being established in 2011 we've put customers first. But our origins date back to 1910 in Chicago when Medline manufactured butcher's aprons, and soon after, surgical gowns. And the rest is history. So, with Medline you get a local team that understand you, backed by a global healthcare company that's been doing it for generations.

Together, advancing healthcare.

Introduction

Your CSSD revolves around your OR. We get that - and that's why Medline's range of products are designed to assist you through each step of the process: from packaging to storage, ensuring you have the right tools to aid in sterilisation and proper safekeeping has never been more important.

Packaging is the critical bridge between preparation and sterilisation. That's why from wraps, to trays and accessories, our easy-to-use products are designed to simplify your work, increase efficiency and help you assemble sterilised instrument trays with confidence.

Sterilisation wrap

Choose the right Gemini wrap for you - whether that be two single sheets wrapped separately, or bonded sheets to wrap simultaneously.

Which ever you choose, both will allow sterilization of the enclosed medical devices, whilst also maintaining sterility until use.

100% polypropylene construction provides high-level barrier protection against fluid and particulates

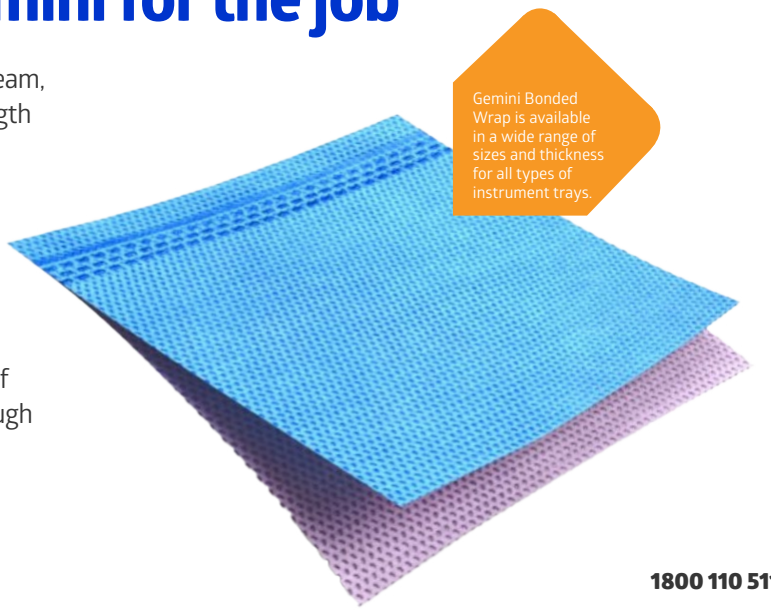
Strong for resistance against holes and tears, with softer, smooth finish easier to handle and fold

Drapeable with less memory, supporting operating theatre staff when opening

Versatility, indicated for use in all major sterilisation cycles:
- Pre-vacuum Steam
- Gravity Steam
- Ethylene Oxide (ETO)
- STERRAD®
- Steris V-Pro®

Bonded wrap: The right Gemini for the job

- Ultrasonically fused at the seam, to provide exceptional strength and improved efficiency
- Comprised of 5 layer SSMMS polypropylene
- Dual blue/pink colouring to differentiate specific instrument sets
- Facilitates easier detection of perforations and strike through



What are you sterilising today?
We have a wrap for that.
From light weight to super weight, we've got more ways for you to wrap with confidence.
