Standard Procedure Packs 2026

Perioperative Management

About Medline

We're a global healthcare company dedicated to being easy to partner with, solving problems, and providing good value. In Australia, from our network of warehouses nationally, we manufacture and distribute an expansive portfolio of products for hospitals, healthcare facilities, aged care, and the community.

Since being established in 2011 we've put customers first. But our origins date back to 1910 in Chicago when Medline manufactured butcher's aprons, and soon after, surgical gowns. And the rest is history. So, with Medline you get a local team that understand you, backed by a global healthcare company that's been doing it for generations.

Added value

Why Medline Standard Packs are right for you

In addition to offering a Standard Pack range for the most commonly performed procedures, we know it's important to provide value beyond just product, including:

- Safety focus
- Sustainability
- Cost control
- Inventory management

Clinical education

We have a national team of clinical educators, who have extensive experience working in operating theatres, who can provide unparalleled support and education on best practice when using our products. From product specifics to the topics and principles of perioperative nursing, we prioritise safety in all aspects of our education to ensure that healthcare professionals can perform procedures efficiently.

Comprehensive risk assessment

We understand that different medical procedures may pertain different levels of associated risk. With that in mind, we design and develop "Standard Procedure Packs" that mitigate these risks. Furthermore, we periodically review our Standard Procedure Packs and the relevance of our products within each pack to ensure they align with current clinical recommended guidelines, related to the appropriate medical procedure.

Quality assurance and regulatory compliance

We adhere to all relevant regulatory requirements and applicable industry standards, and strict quality control measures throughout the manufacturing process. Every product in our Standard Procedure Packs undergoes our component qualification process to enhance its quality, reliability, and safety.

Safety focus

At Medline, we prioritise safety in every aspect of our operations, and our Standard Procedure Pack range is no exception.

We understand the critical role that safety plays in operating theatres, and we are committed to providing products that enhance patient and healthcare provider safety. Our Standard Procedure Pack range focuses on safety through these key features.

Sustainability

We know that healthcare generates an excessive amount of landfill waste, so we're doing everything we can to look after our planet – including reducing our environmental footprint. One of our many initiatives is the introduction of an sustainable kidney dish - now available in applicable Standard Procedure Packs.

These sustainably-made kidney dishes reduce your CO_2e emissions by 80% when compared with a regular plastic kidney dish*. You will see a lot of these in your standard packs!

More info: They are made from a plant-based composite called bagasse, a post-agricultural by-product from sugarcane production that is upcycled to create the fiber pulp. In order to hold fluids, the kidney dish has a biopolymer film that meets applicable biocompatibility standards*.

*Data on file

Cost control

Our standard procedure packs are specifically designed to help customers streamline their operations and reduce unnecessary expenses.

Medline understands the financial challenges facing hospitals, and we believe that we provide an effective way to control costs. We do this without requiring you to compromise on quality or service.

How does Medline control costs?

With a lean and efficient supply chain

Components

Global purchasing power minimises the cost of the components in our packs.

Manufacturing

We own and operate our purpose-built manufacturing facility in Sydney, driving efficiencies every single day.

Warehousing

To minimise shipping time and freight expense, we operate distribution centres in each major city.

Transportation

Our MedTrans fleet of trucks are owned by Medline and driven by Medline staff, reducing the cost of delivery.

Inventory management

Medline owns and manages a fleet of trucks (Medtrans), used to deliver our products to customers. Utilising our Medtrans team, we're now offering Vendor Managed Inventory (VMI) services – a program to create efficiency and provide good value. From our warehouse to your shelves – and everything in between.

Vendor Managed Inventory (VMI) options

1. Delivery to store beyond dock

- Procedure packs remain in cardboard carton
- After hours delivery service available

2. Delivery to store beyond dock with decanting

- Procedure packs unpacked from carboard carton and placed onto shelf
- Cardboard carton waste taken away and recycled
- After hours delivery service available

3. Delivery to sterile store

- Procedure packs unpacked from cardboard carton and placed onto shelf
- Cardboard carton waste taken away and recycled
- After hours delivery service available

4. Delivery to sterile store with stock count and reorder

- Procedure packs unpacked from cardboard carton and placed onto shelf
- Cardboard carton waste taken away and recycled
- Stock count and reorder
- After hours delivery service available

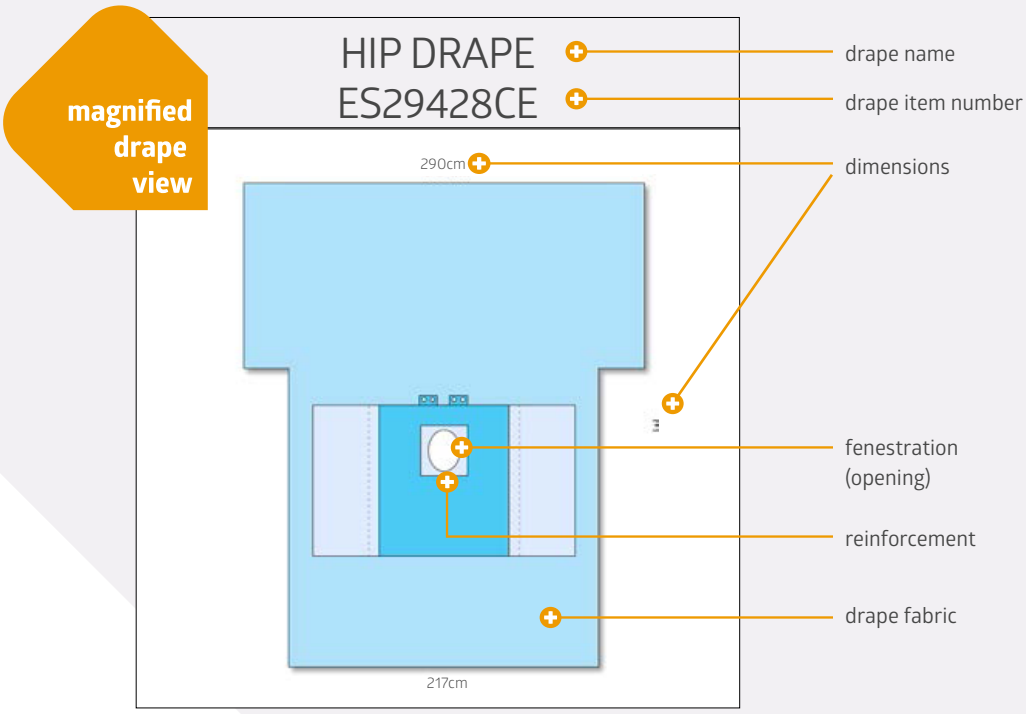
User guide

Pack contents

Contents are categorised into drapes, gowns, sharps, hollowware, etc. Packs may have different categories based on the different components.

Featured drapes (main drape per pack)

The drapes we display in thumbnail views throughout this catalogue are the primary drape of the subject pack and can be ordered separately by their corresponding item numbers.



Coronary Angio Pack
